Subject: Application for Internship

Respected Hiring Manager,

I am writing to express my interest in the AI/ML and Data science Internship position at your organization. I am currently a third-year B.Tech student at Pimpri Chinchwad College of Engineering (PCCOE), with a strong focus on artificial intelligence, machine learning, and full-stack development.

I have hands-on experience building real-world AI systems, most notably a Retrieval-Augmented Generation (RAG) chatbot developed using Python, FastAPI, LangChain, Pinecone, and Neo4j. This system is designed for semantic document retrieval and intelligent question answering, demonstrating my ability to work with LLM pipelines, vector databases, and scalable backend architectures.

In addition to AI/ML, I have worked on data analysis and visualization using Pandas and NumPy, and I am comfortable building end-to-end applications, including frontend integration and backend deployment. My projects reflect a strong problem-solving approach, with emphasis on performance, usability, and real-world applicability.

I am particularly interested in this role because it aligns with my passion for developing intelligent systems that can solve practical problems. I am eager to contribute to your team, learn from industry professionals, and further enhance my skills in machine learning and system design.

I would welcome the opportunity to discuss how my skills and experience align with your requirements. Thank you for your time and consideration.

Sincerely,

Raman Randive

B.Tech, Pimpri Chinchwad College of Engineering
